**Positional Basis: -** This counter after hit high of 40800 continue showing weakness as well as we had mentioned that its give double top chart breakout and we are weak in this counter for long target till \$15.50-\$15.20 very soon. Still we are weak in this counter and due to MACD give sell signal you can keep short on rise around 39300-39500 with some small but strict stop loss and hold for target 37400-36500 very soon.

# CRUDEOIL (JUL)

**Positional Basis:** This counter from long time showing weakness and still more weakness look continue. we are expecting weakness till 2100-2000 soon. As you can see above on chart that crude oil daily chart made head & shoulder chart breakout and it's already give breakout when it was give closing below nick line at 2863 now its look weak up to 2000 soon. But due to target is very big we suggest you to keep short on rise and keep in your mind that long term trend is weak so on every rise you can keep short with some small but strict stop loss.

**Recommendation (Mcx Positional):-**Based on above, Avoid positional call now.

**Intraday Basis:** - This counter yesterday shown good weakness as we expected & mentioned that if it break 2924, its look weak and till it's sustain above it its look bullish. Hope you all are enjoy and made some small profit. From last two days this counter showing some instability. It's again & again trying to touch 3000 but again at night its go down. It means this counter unable to decide where to go. But current short term trend look bullish so we are expecting that it can go up till 3100-3170 very soon.
