GOLD (AUG)

Positional Basis: This counter last week shown good weakness as well as it was close below 27900 as we mentioned above in chart that if it close below 27900, it will give you triple top chart breakout for target 26500-26000 very soon. So keep short on rise with some strict stop loss. in comex gold also given double top chart breakout in range of \$1295 and its active when it was given closing below \$1214 for target \$1135-\$1120 very soon.

Recommendation (MCX Positional) based on above; **SELL GOLD ON RISE AROUND @ 27900 STRICT SL 28500 TARGET 26600-26000.**

Intraday Basis: - This counter at last trading session shown unexpected up move and hit our small stop loss of 27945. Hope you all are book small loss exit in short position. But still we are highly weak in this counter, due to big breakout of "triple top" chart breakout. Now we will not suggest you to keep buy so keep short on rise with some small but strict stop loss. Today watch 28070 this level will play very useful role today. Till it's maintain above this level, its look bullish and till its maintain below this level its look weak.

Recommendation (MCX Intraday) base on above watch level of 28070.

Silver (JUL)

Positional Basis: This counter after hit high of 40800 continue showing weakness as well as we had mentioned that its give double top chart breakout and we are weak in this counter for long target till \$15.50-\$15.20 very soon. Still we are weak in this counter and due to MACD give sell signal you can keep short on rise around 39300-39500 with some small but strict stop loss and hold for target 37400-36500 very soon.

Recommendation (MCX Positional) based on above; Sell Silver around 39300-39500 keep targeting 36700-35000 and stop loss will be 40900.

Intraday Basis: - This counter at last trading session shown some up move but still we are not found any kind of confirm buy signal so we will not suggest you to go with buy and due to our all selling targets almost achieved we will wait for next confirm sell signal. So till then we are not found any confirm clear trend till then please avoid this counter. Due to gold look weak it can also go down so risky traders can keep short with 150-200 points stop loss on every rise. But our best suggest will be avoid this counter.

Recommendation (MCX Intraday) based on above; Avoid this counter.

But watch level of 137.15, if it give closing above this level then our chart breakout of double bottom will active for long target 142-144 soon. Yesterday it was cross 137.15 and hit high 137.50, but unable to give closing above this level, it was closed at 137 so wait for closing above 137.15 and then go with buy for long targets.

Recommendation (Mcx Positional) Based on above, If Close above 137.15 then go with buy Stop loss 131.60 and Target 142-144 soon. **(All Target Hit)**

According to the daily chart MACD give sell signal in this counter and it will soon confirm if it next 2 days give more weakness. CRUDEOIL (JUL)

Positional Basis: This counter from long time showing weakness and still more weakness look continue. we are expecting weakness till 2100-2000 soon. As you can see above on chart that crude oil daily chart made head & shoulder chart breakout and it's already give breakout when it was give closing below nick line at 2863 now its look weak up to 2000 soon. But due to target is very big we suggest you to keep short on rise and keep in your mind that long term trend is weak so on every rise you can keep short with some small but strict stop loss.

Recommendation (Mcx Positional):-Based on above, Avoid positional call now.
